.....

Materials and Methods

Sample of participants (gender, number, etc.)

Instruments: The tools used for measurements are described

Experimental procedure: The procedure for conducting measurements is described

Statistical analyses: The statistical analyses are described

.....
.....

Results

No Tables or photos

Presentation of the study results and their statistical validation

.....
.....

Discussion

A brief reference is made to the results of other studies that are similar to or contradict the results of the present study. It is stated whether the research hypotheses that were set were confirmed. The strengths and limitations

of the work are described. Topics for future research are proposed.

Conclusions

Conclusions regarding the research hypotheses and suggestions for future research.
